

PIVOT Architecture is pleased to announce the second annual PIVOT Architecture Fellowship. The Fellowship is open to University of Oregon BARCH, BIARCH, MARCH, and MIARCH students for the summer preceding their final year of study. One student will be selected following an application process that includes review of the applicants' proposal for a project of their choice to be executed over the summer of the Fellowship. This project will constitute one half of the fellow's responsibility. In addition to the project, the fellow will be incorporated into one or more PIVOT project teams for the duration of the program. The fellowship includes monetary compensation comparable to typical entry level professional architectural positions. Additionally, a \$1,000 stipend will be provided to the fellow upon successful completion of the project and work term.

The PIVOT Fellowship project is intended as a means of fostering original thought about issues outside the daily routine or obvious future trajectory of our firm's thought process. PIVOT Architecture will select an applicant partially based on the nature of their project proposal. Evidence of the candidates' interests, enthusiasm for, and capacity to pursue their chosen topics will be considered in review of their applications. Topics need not be of obvious relevance to PIVOT Architecture's typical activities. PIVOT Architecture will support the fellow's exploration and provide guidance, advice, and mentorship where possible. The fellow will be engaged in dialog, firm-wide, about the project throughout the course of the summer. It is expected that the bulk of the project will be executed within PIVOT Architecture's downtown Eugene office. The nature of the project will be up to the applicant. We encourage broad thinking about the format and substance of the project. The project will culminate with a presentation to the firm and other invited professionals from the realms of practice, academia, and other pertinent professionals. Project documentation appropriate for the nature of the project is expected. The means of memorializing the project is open, but it is expected that the project will have the capacity to be distributed and shared.

The time within a PIVOT project team will allow the fellow to experience professional practice and gain experience with design, documentation, construction administration tasks, and professional office activities and responsibilities. It is anticipated that the fellow will be thoroughly integrated with the daily life of the firm, and leave the experience with a general understanding of the nature and culture of our practice.

Applications for the Fellowship are due March 1, 2019. See below for application requirements. The term of the fellowship is from mid-June to Mid-September, 2019. It is expected that the fellow will work approximately 40 hours/week, with most of that time spent within the office.

### **Application Procedure**

Required application materials include:

1. Letter of introduction and intent, not to exceed one page
2. Resume
3. Portfolio of studio work and evidence of other creative work as desired
4. Names of two faculty members that can be contacted as references
5. Project proposal.

The project proposal shall include a written description of the nature of the project, significance of topic, methodology, objectives, etc. not to exceed three pages. Include description of resources required. Additional pages for images are allowed. Materials in addition to the above mentioned required elements are allowed in any format. Provide required elements as PDFs.
